## The LifeSpice Approach

LifeSpice Ingredients is an innovator, developer and manufacturer of proprietary spice blends and flavor systems for the food industry. Our approach and philosophy toward solving your flavor challenges is based on the principle of balance. We understand that when things are in balance, there is harmony.

LifeSpice works closely with its valued customer partners to identify a specific flavor profile. The process begins with ongoing communication that develops a shared vision of our partners' brand and product equities. LifeSpice then develops spice blends and flavor systems that capture the targeted flavor profiles using LifeSpice's unique development process. Our knowledge of ingredients and global market trends in combination with our skills as formulators helps us to uniquely meet the challenges of our customer partners' projects. LifeSpice maintains a comprehensive library of the newest flavors, processes and technologies that are utilized in our spice blends and flavor systems.

Every proprietary spice blend and flavor system is manufactured in state-of-the-art facilities using the latest manufacturing processes. We use only the highest quality, freshest ingredients to ensure the consistent delivery of premium products. Organic, Kosher and Non-GMO Certifications are available upon request.
